

REMARKS

The applicant respectfully requests the Examiner to consider the application in view of the preceding amendments. The amendments presented do not contain any new matter or raise new issues.

The applicant has canceled claims 2-5 and 6-15. Claim 1 has been narrowed to claim only a threaded screw mechanism. The applicant believes that this makes the invention patentable over the prior art the Examiner has cited before in the Final Office Action to which the Applicant replied on May 21st.

The embodiment the Applicant claims here is shown best in Figure 1. Element number 4 in the figure represents the interior legs and element number 2 represents the exterior legs.

CONCLUSION

By virtue of the amendments, the applicant believes that this application is deemed patentable. Applicant respectfully requests that the Examiner reconsider and withdraw the rejections and allow this application to pass to issue.

Yours truly;
